EDUCATION

Indian Institute of Information Technology (IIIT), Bhopal

2023 – 2027

B.Tech in Electronics & Communication Engineering | CGPA: **7.47 / 10** | Bhopal, India

Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Feature Engineering, MLOps

Achievement: Secured 95+ percentile (Top 5% among 1.2 million students) in JEE Mains 2023

PROFESSIONAL EXPERIENCE

Data Analyst Intern | [Bluestock Fintech](#) | Remote

June 2026 – Aug2026

- **Engineered end-to-end financial data pipelines** processing 10+ complex datasets for 40 mutual-fund schemes by utilizing Python, Pandas, SQLAlchemy, and SQLite to ingest, validate, and structure NAV, AUM, and transaction data.
- **Built a scalable financial analytics engine** for 92 Nifty 100 companies, automating the computation of 50+ critical KPIs (including ROE, ROCE, FCF, and CAGR) by processing and harmonizing 12 distinct source files.
- **Developed quantitative risk and performance models** to evaluate 40 mutual funds against market benchmarks by programming advanced statistical metrics, including Sharpe, Alpha, Beta, VaR/CVaR, and Maximum Drawdown.
- **Streamlined financial screening and investor behavior analysis** by designing optimized SQLite schemas and writing 10+ complex business queries to power an 8-screen Streamlit application and a 4-page Power BI dashboard.
- **Enhanced pipeline reliability and analytical capabilities** by establishing 16 data-quality rules and writing 55+ unit tests, alongside implementing NLP-based financial text parsing, cohort analysis, and automated company reporting.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, HTML, CSS, SQL.

Machine Learning & Deep Learning: Supervised/Unsupervised Learning, CNNs, RNNs, LSTMs, Transformers, GANs, NLP, Computer Vision, RAG, Prompt Engineering, GenAI Tools.

Data Science & Libraries: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, TensorFlow, PowerBI, Hugging Face

MLOps & Tools: MLflow, DVC, Docker, Apache Airflow, FastAPI, Streamlit, Git, GitHub, Advanced Excel, PowerPoint.

Databases: MySQL, ChromaDB, Vector Databases.

Development Environments: Jupyter Notebook, Google Colab, VS Code.

Problem Solving: 200+ DSA problems solved on LeetCode, GeeksForGeeks and Coding Ninjas, Business Analytics.

PROJECTS

Portfolio Optimizer – MLOps Pipeline | *FastAPI · Airflow · MLflow · Docker · DVC · LSTM*

[\[GitHub\]](#)

- **Engineered an LSTM-based stock forecasting model** (TensorFlow/Keras) a 4-layer network (128→64→64→32 units) trained on 24+ years of historical data across 10 NSE-listed equities, using 8+ engineered technical indicators (RSI, MACD, log returns, 13/55/233-day moving averages) on a 60-day sliding window.
- **Orchestrated a 4-stage MLOps pipeline with Apache Airflow and MLflow** automated daily data ingestion, feature engineering, conditional model retraining, and evaluation (RMSE, MAE tracked per run).
- **Built a portfolio reallocation and backtesting engine via FastAPI** programmed rule-based capital rebalancing (reallocating the bottom 33% of underperformers) and validated returns against a buy-and-hold baseline.

Agentic Voice Assistant – RAG Customer Support | *STT · LLM · RAG · TTS · ChromaDB · FastAPI*

[\[GitHub\]](#)

- Built a full-stack voice assistant pipeline integrating Speech-to-Text (STT), LLM reasoning, Retrieval-Augmented Generation (RAG), and Text-to-Speech (TTS).
- Implemented semantic search with ChromaDB and vector embeddings to deliver accurate, context-aware responses.
- Designed modular FastAPI microservices backend and a Streamlit frontend for scalable audio processing.

EXTRACURRICULAR ACTIVITIES.

Sports Achievements – University Representative

- Table Tennis: Selected for NSO Table Tennis team (5% acceptance ratio); active university-level tournament participant.
- **Advanced to Round 2 (Top 1600) of [Gridlock Hackathon 2.0]**, solving a smart-city traffic analytics problem statement — designed a data-driven approach to forecast event-driven congestion and recommend optimal manpower and diversion plans using historical and real-time traffic data.
